CHIAYO

Operation manual

COACH PRO Personal Wireless PA System

Important safety instructions

- Read all of the instructions before the product is operated.
- Keep these instructions well for future reference.
- Follow all of the warnings and instructions when installing, setting up and using the product.
- Only clean the product when it is not connected to the power supply system. Clean only with a dry cloth.
- Keep ventilation openings unblocked and follow with the manufacturer's instructions for installation.
- Do not immerse product in any liquid or expose to heat or moisture
- Keep the complete polarized or grounding type plug without any modification. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wider blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- Power supply cords should be well routed to prevent from being walked on or pinched by items placed upon or against them, particularly at plugs, convenience receptacles, and the point where they exit from the product.
- Use only manufacturer authorized or recommended accessories.
- Use only with a cart, stand, tripod or accessories specified or provided by Chiayo. Be careful when using a cart to avoid injury from tip-over.
- Unplug the product during an electrical strom or when unused for long periods of time.
- Never disassemble, modify or service the product. Any unauthorized modifications may result in personal injury and/or product failure. Additionally, your warranty will be void.
- Please read and follow the instructions in this manual thoroughly to obtain optimum results from this unit. We also recommend that you keep this manual handy for future reference.

Warning

Please read and follow the instructions in this manual thoroughly to obtain optimum results from this unit. We also recommend that you keep this manual handy for future reference.

Safety Precautions

- Be sure to read the instructions in this section carefully before use.
- Make sure to observe the instructions in this manual as the conventions of safety symbols and messages regarded as very important precautions are included.

Safety symbols and messages described below are used in this manual to prevent bodily injury and property damage which could result from mishandling. Before operating your product, read this manual first and understand the safety symbols and messages so you are thoroughly aware of the potential safety hazards.

Indicates a potentially hazardous situation which, if mishandled, could result in death or serious personal injury.

Indicates a potentially hazardous situation which, if mishandled, could result in moderate or minor personal injury, and/or property damage.

Make sure to observe the following handling precautions so that a fire or personal injury does not result from leakage or explosion of the battery.

- Do not short, disassemble, heat or put the battery into a fire.
- Never charge batteries of the type which are not rechargeable.
- Do not solder a battery directly.
- Be sure to use the specified type of battery.
- Note the correct polarity when inserting a battery in the unit.
- Avoid locations exposed to the direct sunlight, high temperature and high humidity when storing batteries.

To prevent the electromagnetic wave from badly influencing medical equipment, make sure to switch off the unit's power when placing it in close proximity to the medical equipment.

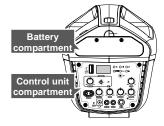

Battery discharge naturally according to a certain pattern even not in use. For best performance and a prolonged lifespan, battery **should** be charged regularly after every use or every month when the system is in storage and not being used! CD player optical pick up head is a very delicate device and sensitive to humidity. Please avoid using it in high humidity area to avoid damage!

1. Instruction

Congratulations and thank you for purchasing this personal wireless PA system. To ensure a trouble-free operation, please read the manual thoroughly to fully understand its controls and functions.

This portable amplifier is divided into 2 major sections:

- 1. Control unit compartment on the rear panel
- 2. Battery compartment on the bottom

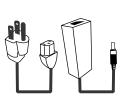

1-1. In the box

0-1 handheld / beltpack transmitter (optional)

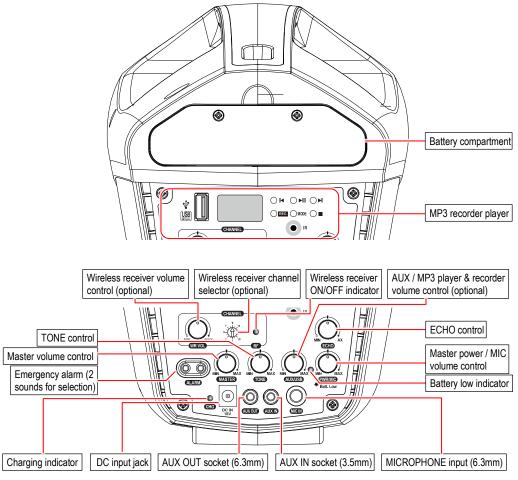

Switching power supply (plug varies from country to country)

1-2. Optional related products

. . .

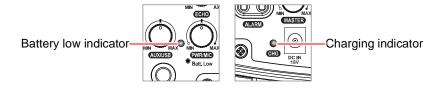

Transmitters			
SQ-5116	Handheld microphone	SM-2016	Belt-pack transmitter
Accessories			
ST-30	Tripod stand: standard	SB-61	Carrying bag
DM-series	Wired microphone, please refer to CHIAYO website.		

1-3. Parts and functions

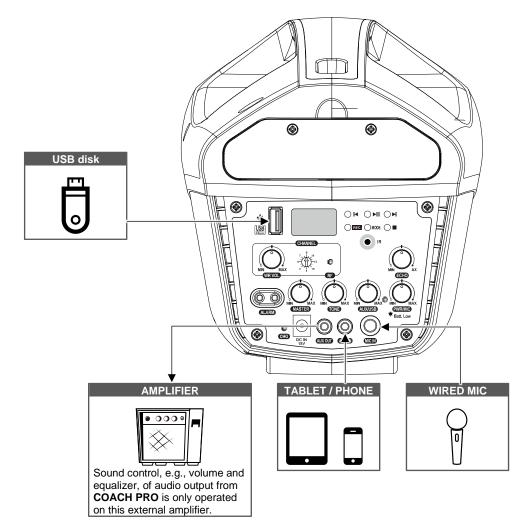

1-4. Charging the battery

If the battery indicator turns solid RED, the battery might not be sustainable for long operation and needs to be charged.

Charging indicator	Condition
Solid RED	During recharging
Solid GREEN	Fully charged

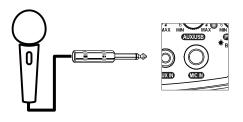

1-5. Connection with external audio sources

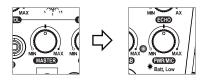

2. Settings and Operations

2-1. Using the wired microphone (MIC IN)

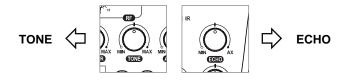

1 Plug a wired microphone with a 6.3mm plug to **MIC IN**.

2 Turn ON master POWER and adjust **MASTER** volume to default level (12 o'clock). Then adjust **PWR/MIC** volume control to desired level.

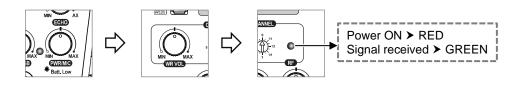

3 LOW-HIGH TONE and ECHO can be adjusted. (refer to P.12)

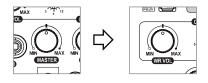

2-2. Using the wireless receiver

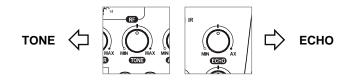

1 Turn ON master POWER and **WR VOL** in order, the receiver's power indicator will glow RED. After turning ON the transmitter, this LED will turn GREEN.

2 Adjust MASTER volume to default level (12 o'clock). Then adjust WR VOL volume control to desired level.

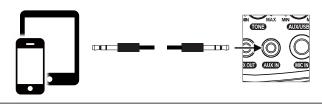

3 LOW-HIGH TONE and ECHO can be adjusted. (refer to P.12)

2-3. Music audio input (AUX IN)- Smart phone / tablet / MP3 player

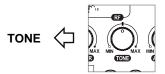

1 Connect your device to the 3.5mm jack of AUX IN with a 3.5mm 3-pole stereo audio cable.

2 Turn ON master POWER and adjust **MASTER** volume to default level (12 o'clock). Then adjust **AUX/USB** volume control to a desired level.

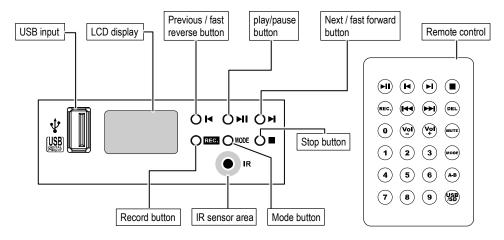

3 LOW-HIGH TONE can be adjusted. (refer to P.12)

2-4. Using the MP3 player & recorder

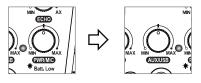

2-4-1. Parts and functions

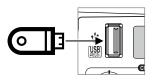

2-4-2. Operating functions on the panel and the remote

Operating function	On the panel	On the remote
Play/pause	Press 川	Press 知
Record	Press 🖸 to record and 🎦 or 🗖 to stop.	Press 🚥 to record and 외 or 🚺 to stop.
Skip forward	Press ►	Press 🔁
Fast forward	Press and hold D	Press and hold ව
Skip backward	Press 🖪	Press 🖪
Fast backward	Press and hold	Press and hold 🖪
Next folder	-	Press 🔁
Previous folder	-	Press 🔁
Track select (#0-9)	-	input track number, then press 된
Repeat mode switch (ALL/SINGLE/FOLDER)	Press Mode	Press
Volume control	-	Press (Ve) or (Ve)
A-B section play	-	Press 🕶 to start, again to play section and again to stop
Delete tracks	-	Press 🖭 to delete track and again to confirm your delete
Mute	-	press 🚥 to mute/recover

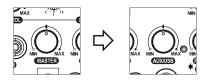

1 Turn ON master POWER and **AUX/USB** in order.

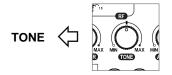

2 Plug the USB and the music will play automatically. To dispatch the USB, please turn off the player first.

3 Turn ON master POWER and adjust **MASTER** volume to default level (12 o'clock). Then adjust **AUX/USB** volume control to desired level.

4 LOW-HIGH TONE can be adjusted. (refer to P.12)

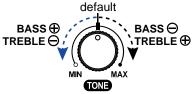

Note:

- Supports FAT and FAT32 file systems only.
- Supports MP3, WAV and WMA music formats only
- Record track format: MP3; Bit rate: 128kbps; Sampling frequency: 44kHz
- Recordable only when USB is detected.
- Record files will be stored in the RECORD folder of USB.
- The files will be named as FILE_001, FILE_002, FILE_003...etc.
- The name of a deleted track won't be applied to its next one.
- Recordable until FILE_999 appears with LCD displaying Num Full.
- LCD displays **USB FULL** when insufficient memory left.
- Don't remove the USB during the recording process in case the interrupted track might be damaged.

2-5. TONE for WIRED and WIRELESS MICROPHONE and MUSIC

TONE adjustment is actually used to increase or reduce the high/low frequency component of the speaker's restored sound. It is so-called raising or attenuating HIGH (MAX) / BASS (MIN) via frequency-specific volume knob to improve human voices or make musical instruments' sound more prominent. According to the scale mark on the panel, clockwise adjustment is to increase / boost high frequency and decrease / attenuate low frequency, opposite to increase / boost low frequency and decrease / attenuate high frequency.

Adjust the level of high frequency (MAX) and low frequency (MIN). All signals have been balanced by the high and low sounds after entering the amplifier so it is not necessary to adjust the TONE during the output to the speaker. It is recommended to maintain the position of TONE at just 12 o'clock.

DIRECTION	MAX (CLOCKWISE)	MIN (COUNTERCLOCKWISE)	
FUNCTION	increase the high frequency and reduce the low frequency component of the sound	increase the low frequency and reduce the high frequency component of the sound	
RANGE	-12 dB ~ +12 dB		
DEFAULT	12 o'clock		

Adjustment reference:

- MAX (TREBLE): It is the basic part of the sound. It accounts for 70% of the entire audio energy and is an important component to display the music style. When appropriate, the BASS is relaxed and the sound is full and soft. If you feel the sound is thin, you can moderately increase the BASS. If you feel the sound is muffled, not clear, or too nasal, you can moderately reduce the BASS.
- MIN (BASS): It's the frequency that affects the sound layering. If you feel that the sounds of instruments such as Piccolo and Flute are too prominent, or the tooth sound of the voice is too heavy and the tone is sharp, you can moderately reduce the TREBLE.

2-6. ECHO for WIRED and WIRELESS MICROPHONE

This function can add extra depth to the sound of **WIRED or WIRELESS MICROPHONE** to create a realistic acoustic ambience. You can adjust the reverb depth by using the ECHO knob. The depth range is from MIN through MAX. The MIN level produces no effect, while MAX level produces maximum reverb depth.

3. FAQ & useful operation tips

1 How to adjust the best volume?

Gradually adjust the volume of audio inputs from minimum to an appropriate level. Then adjust volume according to the surrounding environment and the required sound (microphone, MP3 ... etc.).

${f 2}$ Is it possible to play music storing on external devices via wireless amplifier?

Yes. **COACH PRO** wireless amplifier has an auxiliary audio input (AUX IN) for connection with external devices such as notebook, mobile phones or tablets. The built-in MP3 recorder has remote control and offers more versatile functionality.

3 Is it possible to record the sound of Microphone or external devices when using COACH PRO?

Yes. The built-in MP3 recorder on COACH PRO has the recording function.

4 How to avoid or reduce feedback?

Do not stand in front of the speaker when using the microphone.

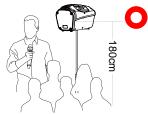

Do not point the wireless microphone towards the speaker.

Use the microphone behind the speaker Locate the wireless amplifier between as possible.

■ Locate the wireless amplifier between the speaker and the audience with the speaker facing the crowd. Place the wireless amplifier on a tripod stand and above the head of audience (about 180cm).

Turn down the volume if necessary.

5 Does a wireless amplifier need to be installed with a tripod? What is the ideal height for Amplifier above the ground?

Higher position of a wireless PA will be helpful for signal reception. It can be mounted on the tripod and above the ear or head of the audience. If the tripod is not allowed on site, you can also raise it on a table or a flat object while the amplifier leaves the ground by 1 meter or more.

6 Will wireless amplifier automatically power off once it is fully charged? Do I need to unplug the power cord?

Yes. Since all CHIAYO amplifiers have an overcharge protection circuit that automatically power off at full charge and prevent damage to the system. However, please unplug the power cord after fully charging to ensure the safety.

${f 7}$ How to charge and maintain the battery of wireless amplifier?

After plugging the power cable of the wireless amplifier into a standard outlet, the charging LED will glow or flash indicative of charging status. The wireless amplifier can be charged whether power on or off.

The amplifier's battery has no memory effect and can be charged any time. It is suggested to charge the battery right after usage to make the battery life longer. If not to use it for a long period, please charge the battery at least every three months for lead-acid batteries and six months for lithium batteries.

The battery life is limited and affected by the environment, charging method and battery efficiency.

8 Is it possible that COACH PRO can work as amplifier only? Can I use only one or more microphones? How many wireless microphones can be used at most?

COACH PRO can work as amplifier only. Only one microphone can be used on the amplifier.

4. Maintenance-free Lead-acid and Lithium batteries

Cautions when using the battery

- 1. Lead-acid batteries/lithium batteries have no memory effect. Please charge them up immediately after each use, no matter how much power they left. If the battery is not charged for a long time, it may cause the battery to be over-discharged and damaged, making it impossible to charge normally.
- 2. Usage temperature can't be lower than -10°C nor higher than 50°C.
- 3. It's strictly forbidden to let the battery contact with any liquid. Do not immerse the battery in water or get it wet. After the battery is exposed to water, a decomposition reaction may occur, which may cause battery self-ignition or even cause an explosion.
- 4. It is forbidden to use the battery when it has swelled, leaked, or the packaging is damaged.
- 5. It is forbidden to disassemble the battery in any way or pierce the battery with a sharp object, so as not to cause the battery to catch fire or even cause an explosion.
- 6. The liquid inside the battery is highly corrosive. If it leaks, please do not touch it. If the internal liquid splashes on human skin or eyes, please immediately rinse with clean water for at least 15 minutes before seeking medical attention.
- 7. It is forbidden to use wires or other metal objects to short-circuit the positive and negative electrodes of the battery.

Cautions when charging the battery

- 1. Lead-acid batteries/lithium batteries have no memory effect. Please charge them up immediately after each use, no matter how much power they left. If the battery is not charged for a long time, it may cause the battery to be over-discharged and damaged, making it impossible to charge normally.
- 2. Please use the power supply specified by CHIAYO for charging.
- 3. The CHIAYO amplifier has a protection circuit to prevent overcharging. To ensure safety, the charging time should not exceed 12 hours. Please disconnect the power supply when fully charged.
- 4. Charging temperature can't be lower than 0°C nor higher than 40°C.
- 5. When charging, please place it on the hard ground, such as cement, and there should be no flammable or combustible materials around. Please pay attention to the charging process to prevent accidents.
- 6. It will automatically stop charging when fully charged. After the battery is fully charged, it is recommended to disconnect the amplifier from the power supply.
- 7. When the power supply is not disconnected and the amplifier is not in use, if the battery is fully charged and then recharged again soon after, it means that the battery is aging and cannot store power. Please replace the battery to ensure enough time for operation.

Cautions when storing the battery

- 1. Lead-acid batteries/lithium batteries have no memory effect. Please charge them up immediately after each use, no matter how much power they left. If the battery is not charged for a long time, it may cause the battery to be over-discharged and damaged, making it impossible to charge normally.
- 2. Lithium batteries will automatically discharge in storage. If they are not charged for a long time, they will over discharge that causes a decrease in capacity and damage to the batteries that can no longer be charged normally. It should be fully charged at least once every 6 months.
- 3. Lead-acid batteries will automatically discharge in storage. If they are not charged for a long time, they will over discharge that causes a decrease in capacity and damage to the batteries that can no longer be charged normally. It should be fully charged at least once every 3 months.
- 4. Storage temperature can't be lower than -10°C nor higher than 40°C.

Disposing the battery

Be sure to completely discharge the battery before placing it in the designated battery recycling bin. Batteries contains dangerous chemicals. When disposing of old batteries, be sure to follow the local battery recycling and disposal regulations, and it is strictly forbidden to put them in a trash can.
